Introduction

This portfolio is a selection of drawings and illustrations I made during these last two years. Of course, as a 3D character animation student, my typical day was more about handling animation softwares than sketching... That being said, I keep drawing every now and then. I believe it helps understanding expressions, lines of action, and how to simplify and amplify shapes that convey the narratives.

Thank you for reading.

You can find my 3D animation reel this way :
